

## A Step Ahead of Omnichannel Demand Reinvent Your Product Fulfillment Strategy

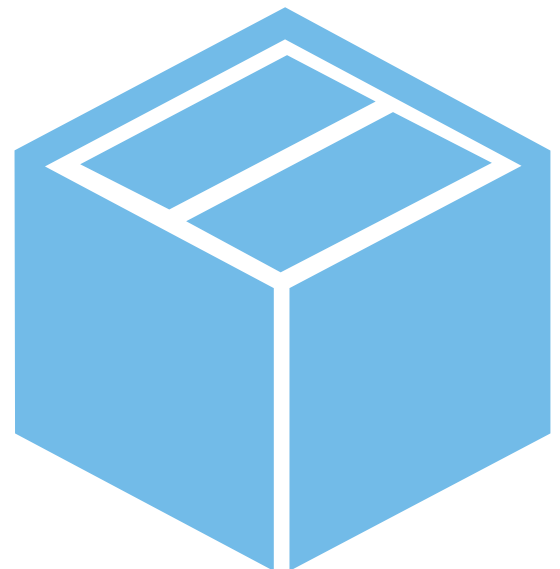

The omnichannel revolution has forever changed the speed and flow of your supply chain. While customers expect a consistent shopping experience across sales channels, fulfilling those demands has never been more complex.

High consumer expectations require technology that promotes a more collaborative approach to trading partner relationships. By delivering a holistic view of consumer demand and inventory, our Fulfillment solutions give you visibility into orders, shipments, returns and more. The result? A much nimbler supply chain that is ready for omnichannel commerce.

### Integrated Fulfillment Creates Omnichannel Scale

Connect your business system of record (ERP, WMS or TMS) once to the retail industry's largest network and achieve seamless collaboration with all the trading partners you do business with, now and in the future. Our Integrated Fulfillment solution provides:

- **More efficient communications and transactions:** Seamlessly manage orders, shipments, payments and returns while optimizing relationships with trading partners.
- **Consistent upgrades:** Our world-class retail cloud services are continuously improving with enhancements and upgrades that keep the supply chain moving without interruption.
- **Streamlined integration:** Quickly collaborate with the industry's largest network of retailers, suppliers, carriers, 3PLs and more. Our solution eliminates complexity from continuously evolving specifications and supply chain requirements to keep up with retail transformation.
- **Expert implementation and support:** Our team of experts helps your company quickly get up and running with our service, and certifies your system to our retail standard (RSX) through a straightforward process of consulting, building and testing your integration. Once your implementation is complete, our customer support team is available 24/7/365.
- **Reporting and visibility:** Gain visibility into all transactions required to successfully track and monitor business relationships, allowing your company to stay compliant with the ever-changing demands from trading partners.

## WebForms Fulfillment: Compliance Without Complexity

Collaboration with your trading partners doesn't have to be complicated or costly. Use our WebForms Fulfillment solution to exchange purchase orders, invoices, advance ship notices and more via our cloud-based services.

- **Automated transactions, enhanced accuracy:** Streamline transactions with your trading partners, all from one cloud-based system, and ensure that data is consistent and correct with every exchange.
- **Effortless compliance:** We own and maintain integrations with thousands of trading partners, ensuring you meet the latest technical and business requirements.
- **Proven and ready:** Our pre-built forms are continuously tested and improved, so you can count on their accuracy. Our team of experts is available when and where you need them, via self-paced tutorials or in-person training sessions.
- **Enhanced trading partner relationships:** Our user-friendly WebForms Fulfillment product includes the tools you need to do more business, more efficiently:
  - Customized trading partner configurations ensure you're always sending the right documents and data.
  - An auto-complete feature gives you the ability to quickly create and send documents en masse.
  - Reusable templates increase speed and accuracy.
  - Carrier integration with FedEx and UPS to streamline your shipping process with accurate and complete data.
  - Support for laser and thermal GS1-128 shipping labels, pallet labels, UPS and FedEx labels, branded packing slips.
  - Item repository to enable quick and easy access to item data to speed up data entry.
  - Search and sort capabilities to streamline workflow.
  - Email notifications for new documents and errors.
